

## Filtration:

1. Pressure Sand Filters
2. Activated Carbon Filter
3. Iron Removal Filter

## Ion Exchange Process

1. Softener
2. DM Plant
3. De- ionization (Reverse Osmosis plant with a flow range of 200 LPH to 20000 LPH)

## Sewage Treatment Plant Processess

1. Extended Aeration
2. MBBR
3. MBR
4. Packaged Plants(Range 25 cum/day to 150 cum/day)

## Effluent Treatement Plant Type of Industries

1. Dairy
2. Plating
3. Automobile
4. Sugar
5. Others

## About us

*Our Specialization includes Turnkey Projects( Design , Engineering, Supply, Erection, Commissioning, Operation and Maintenance for below systems and plants. Establishe in the year 2011, has emerged with excellent sales cum service team back up to cater the neede in the market scenario. the service team back is fundamentally strong in water treatment equipment, especially in REVERSE OSMOSIS and.ULTRA FILTRATION.*

## Mission

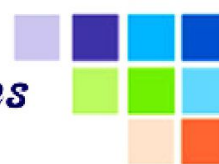

“ Our mission in the above perspective is to give you a facility to attain a higher productivity ensuring lower cost involvement so that your organization can earn more profit. ”

# Joval Enterprises

Water and Waste Water Treatment Plant

## Why Joval Enterprises ?

Water treatment as per our knowledge is total water management in a focused approach. It has two wings. One is to enhance the quality of raw water so that the treated water suits the requirements of the system and the other deals with the optimum usage of water in any industrial or domestic sector where the same water can be used several times by recycling it.

In due course this process perpetuates the water from unprincipled use, which in turn saves recurring costs, because the total water in the industry is in motion driven by power through high capacity pumps, which never comes free in cost!!! Keeping in view the above factors it is sure that you are well convinced that this water is in the threshold of becoming a headache to several industrial and domestic personnel.

On keeping an extensive watch on this market it had been found that a large sector of industry needs to be provided for the optimum performance of their existing water treatment plant. Besides we found some who are really facing problems and they are confused about exactly what type of treatment could make their particular system run uninterruptedly and efficiently.

The overall market is huge where only a couple of stalwarts are playing, obviously customer preferences and satisfaction gets buried in.

So, this made a group of engineers to unite under a banner of Hudor Aqua Technologiesto provide customized, cost effective solutions for varied requirements. Each of the technicians is qualified and expert in solution of water treatment. They have the capacity to diagnosis the fault and respond quickly and find efficient remedy.

JOVAL ENTERPRISESS are renowned as one of the OEM manufacturer and supplier of a qualitative range of Water Purifier & Water Treatment Plant, Water Filtration Plants, Swimming Pool Filters, Pressure Transmitter, Carbonation Soda Plant and many more. These are available in various specifications and are widely demanded in several parts of the country. These Water Purifier & treatment Plants are manufactured using excellent quality of raw material that is procured from quality driven & trusted vendors.

### We Provide

- Boiler Water Treatment Chemicals
- Cooling Water Chemicals
- Reverse Osmosis Chemicals
- Wastewater Treatment Chemicals

### Operation & Maintenance

We provide various operation and maintenance (O&M) support services with several contractual options to meet the specific needs of the customer.

### Water Treatment Chemicals

We provide a huge array of efficacious and reliable industrial Water Treatment Chemicals that is highly demanded by national and international clients.

### Water Treatment Components

Our company supplies qualitative range of Water Treatment Components, in a wide variety, manufactured from finest quality raw

## Quality Control

- Chemical Dosing Systems
- Filter Cartridges
- Filtration Media
- Flow Meters
- Multiport Valves
- Ion Exchange Resins
- Membranes
- PVC Distribution System
- Frp Vessels
- Conductivity Controller
